

CLAIMS

1. A skin collagen production promoter comprising, as an active ingredient, a milk-derived basic protein fraction and/or a basic peptide fraction obtained by degradation of the milk-derived basic protein fraction with a protease.
2. A skin collagen production promoter according to claim 1, wherein the milk-derived basic protein fraction comprises a fraction that has an amino acid composition containing 15% by weight or more of a basic amino acid.
3. A skin collagen production promoter according to claim 1 or 2, wherein the milk-derived basic protein fraction comprises a fraction obtained by: adsorbing a basic protein by contacting milk or a milk-derived material with a cation exchange resin; and then eluting the fraction adsorbed to the resin with an eluent having a salt concentration of 0.1 to 1 M.
4. A food or beverage product for promoting skin collagen production, comprising the milk-derived basic protein fraction and/or basic peptide fraction according to any one of claims 1 to 3 incorporated therein.

5. A cosmetic for promoting skin collagen production,
comprising the milk-derived basic protein fraction and/or basic
peptide fraction according to any one of claims 1 to 3 incorporated
therein.
